

Environmental Sustainability Initiative

At McDonald Plastic Molding we are committed to embarking on a decarbonization journey to mitigate the impacts of climate change. We understand that the path to decarbonization is a journey that requires continuous effort and adaptation. We remain dedicated to playing our part in building a sustainable future. We achieved our goal of 50% reduction in our Scope 1 and Scope 2 emission intensity (per unit of revenue) by 2025. Our next target is to achieve a 65% reduction in emissions by 2030.
